

Introducing Board Admin
The fast and simple secure
board reporting package for
your board of directors and staff.

Board Admin:

Board Admin is the official Trade Mark Name. It has been federally registered and Trade Marked.

Description:

Board Admin is a managed file storage/ distribution system. Board Admin is hosted on a secure Linux system that has been specifically developed for this product.

Technical Server Information:

Board Admin is a very simple text based application. All functions and actions have been streamlined for best possible load time. Server requirements are minimal. We have built a system to support 500 individual versions of Board Admin running simultaneously. As many as 1000 users can be accessing Board Admin simultaneously.

Language:

Utilizing Linux as the main controller of Board Admin, speed and stability have been maximized. Linux and Linux clones can be used to host Board Admin. PHP is the front end language. No other specific libraries are needed. MYSQL is the database portion and with PHP written specifically for MYSQL database Board Admin load time is at best possible levels.

Drive/Backup:

Document storage requires very little drive space. We have implemented 3 drives to split up document storage. A controller is installed to allow quick upgrades as needed. Backup is done off site on a daily bases. A second machine is in place for backups and redundancy. Should the main system come off line the second machine comes online automatically.

Security:

Linux white box uses automatic security updates. With this in place Board Admin is %100 secure from the most current version. Transfer of data (such as board documents) is done via secure internet protocol. Board Admin uses the top security transfer protocol. 128 bit secure server certificates. The information is passed from our server to the users computer encrypted. A specific key is passed and only the initial user is allowed to view the encrypted data.

User Specifications:

Any 128 bit encrypted internet browser can be used to access and use Board Admin. Board Admin

was developed with simplicity in mind so even dial up users can access Board Admin with out long download wait times. Only the size of documents will be cause download dependency.
